

Welcome to Morris and Alexander - Chair, Bed and Settee Raising Specialists

Morris & Alexander Ltd are renowned for the original patented Morris® Chair Raiser and Alexander® Chair Raiser.

We are an established and leading supplier of furniture raising equipment which is designed and manufactured in England.

Our reputation has been built on our customer satisfaction, speed of delivery and excellent safety record.

Our Raisers are designed to increase the height of your existing furniture to aid mobility which eliminates the need for expensive purpose built furniture. They sit neatly under the item to be raised. As safety is of paramount importance these raisers are securely attached to the furniture to ensure that the chair, bed or settee is completely stable, this also allows for the furniture to be moved without fear of the raisers becoming dislodged.

They are made from high quality steel and finished in satin black paint. They can be easily cleaned or sterilised for re-use and are extremely discreet in appearance.

All materials used in these products are recyclable.

If you require expert advice on furniture raising, or are unsure about which raiser to use, please contact us on 01328 855669 or at info@morrisandalexander.com and one of our technical staff will be happy to help.
